

ENGF0034: Design and Professional Skills

Introductory lecture

Prof. Martin Benning
30 September 2025

ENGF0034 2025/26 is a team effort

Chika Nweke

Yuzuko Nakamura

Vivek Ramachandran

Fiona Truscott

Sunny Bains

Teaching Assistants

Yiliu (Aiden) Li

Yiqian (Ken) Liu

And many more

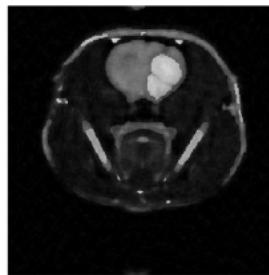

Who am I? Professor of Inverse Problems

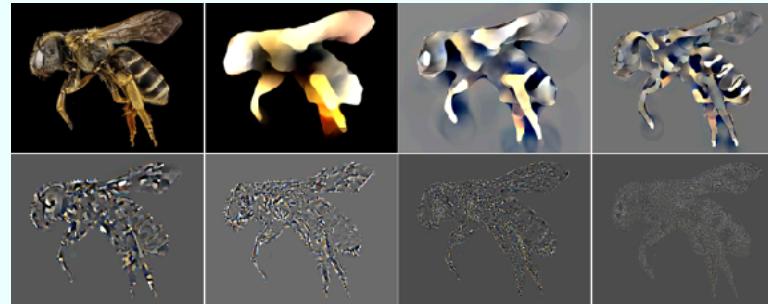

Martin Benning

Areas of expertise:

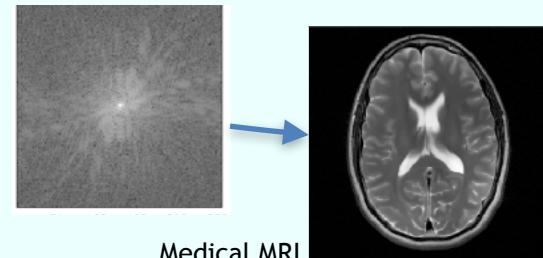

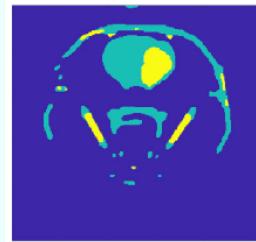

- Inverse & Ill-posed problems
- Regularisation theory
- Machine learning
- Optimisation
- Industrial & medical Imaging
- Image processing

Joint reconstruction & segmentation

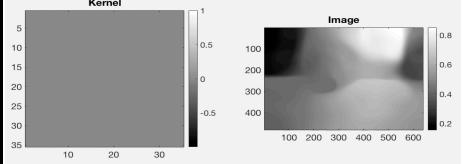

Nonlinear spectral decomposition

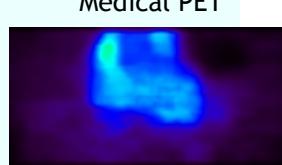

Medical MRI

Blind image deconvolution

Industrial MRI

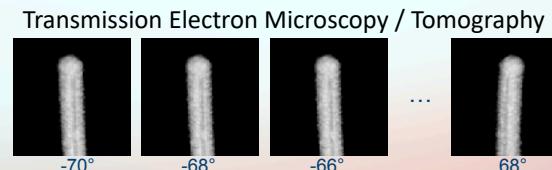

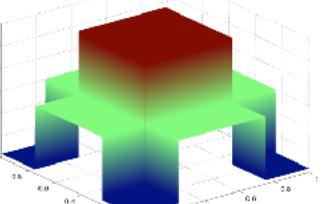

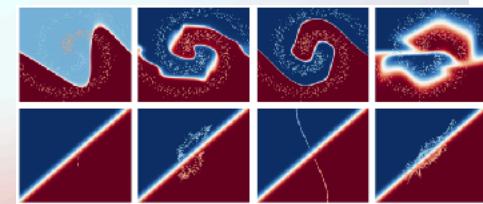

Medical PET

Nonlinear eigenfunctions

Classification with residual neural networks

Transmission Electron Microscopy / Tomography

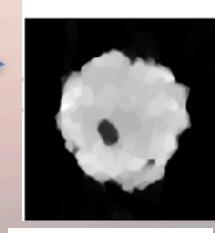

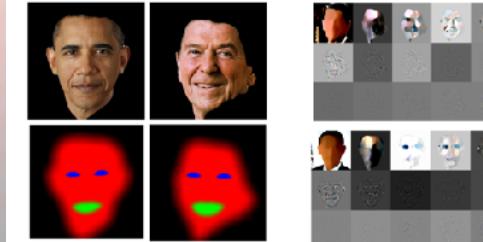

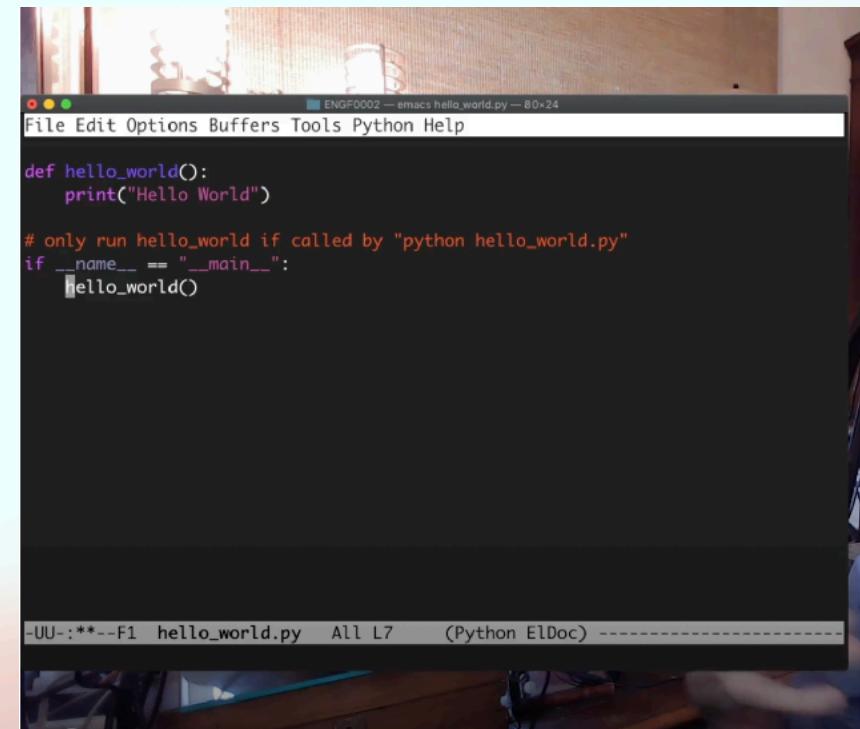

Image reconstruction

Nonlinear image fusion

Module approach

- Lectures (almost) every **Tuesday**
- Tutorials (almost) every **Friday**
- **Ask and answer questions** via the Moodle forum
- Course materials will be released via **git**
- Assessments will be released via **Github Classroom**
(or Moodle)
- Drop-in clinics will take place as extra support for
those new to programming

```
ENG0002 - emacs hello_world.py -- 80x24
File Edit Options Buffers Tools Python Help

def hello_world():
    print("Hello World")

# only run hello_world if called by "python hello_world.py"
if __name__ == "__main__":
    hello_world()

-UU-:***-F1  hello_world.py  All L7  (Python ElDoc) -----
```

Let us checkout the module **Moodle** & **git** pages

Drop-in clinics

Teaching Assistants

Yiliu (Aiden) Li

Yiqian (Ken) Liu

- Drop-in clinic Aiden & Ken (in-person): Thursday, 4-5 pm
G03, Henry Morley
- Drop-in clinic Aiden (in-person): Friday, 1-2 pm
G03, Henry Morley
- Drop-in clinic Ken (in-person): Wednesday 3-4 pm
G03, Henry Morley

(Starts next week!)

Assignments

- Week 1 - 2: Introductory programming assignment
- Week 2 - 3: Debug the bomber game
- Week 3 - 5: Debug the frogger game
- Week 5 - 7: Write a tetris autoplayer (20%)
- Week 7 - 9: Write pacman protocol specification (15%)
- Week 7 - March 22 in Term 2: Ethics report (15%)
- Term 2 Reading Week: Presentations (10%)
- + Scenario assessments in Term 2 (remaining 40%)

Assignments

- Week 1 - 2: Introductory programming assignment
- Week 2 - 3: Debug the bomber game
- Week 3 - 5: Debug the frogger game
- Week 5 - 7: Write a tetris autoplayer (20%)
- Week 7 - 9: Write pacman protocol specification (15%)
- Week 7 - March 22 in Term 2: Ethics report (15%)
- Term 2 Reading Week: Presentations (10%)
- + Scenario assessments in Term 2

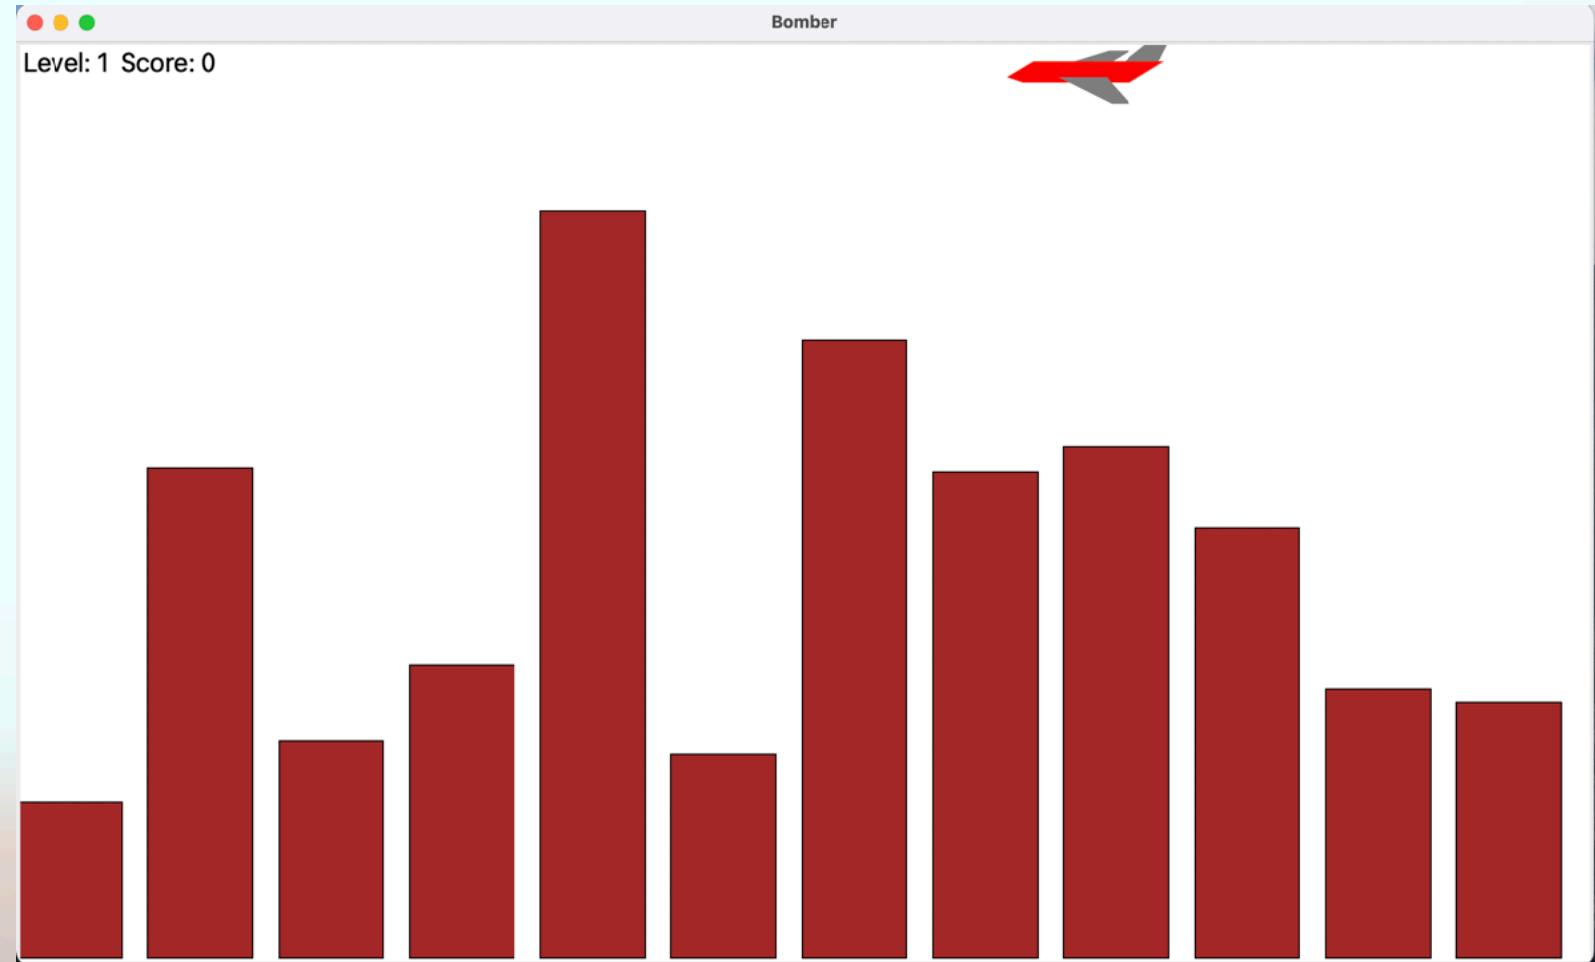

Do not plan time away
during reading week!

Assignments

Assignment 2: (Canyon) Bomber

Classic Atari Arcade Game from 1977

Task: Find five bugs that make the game unplayable, and fix them!

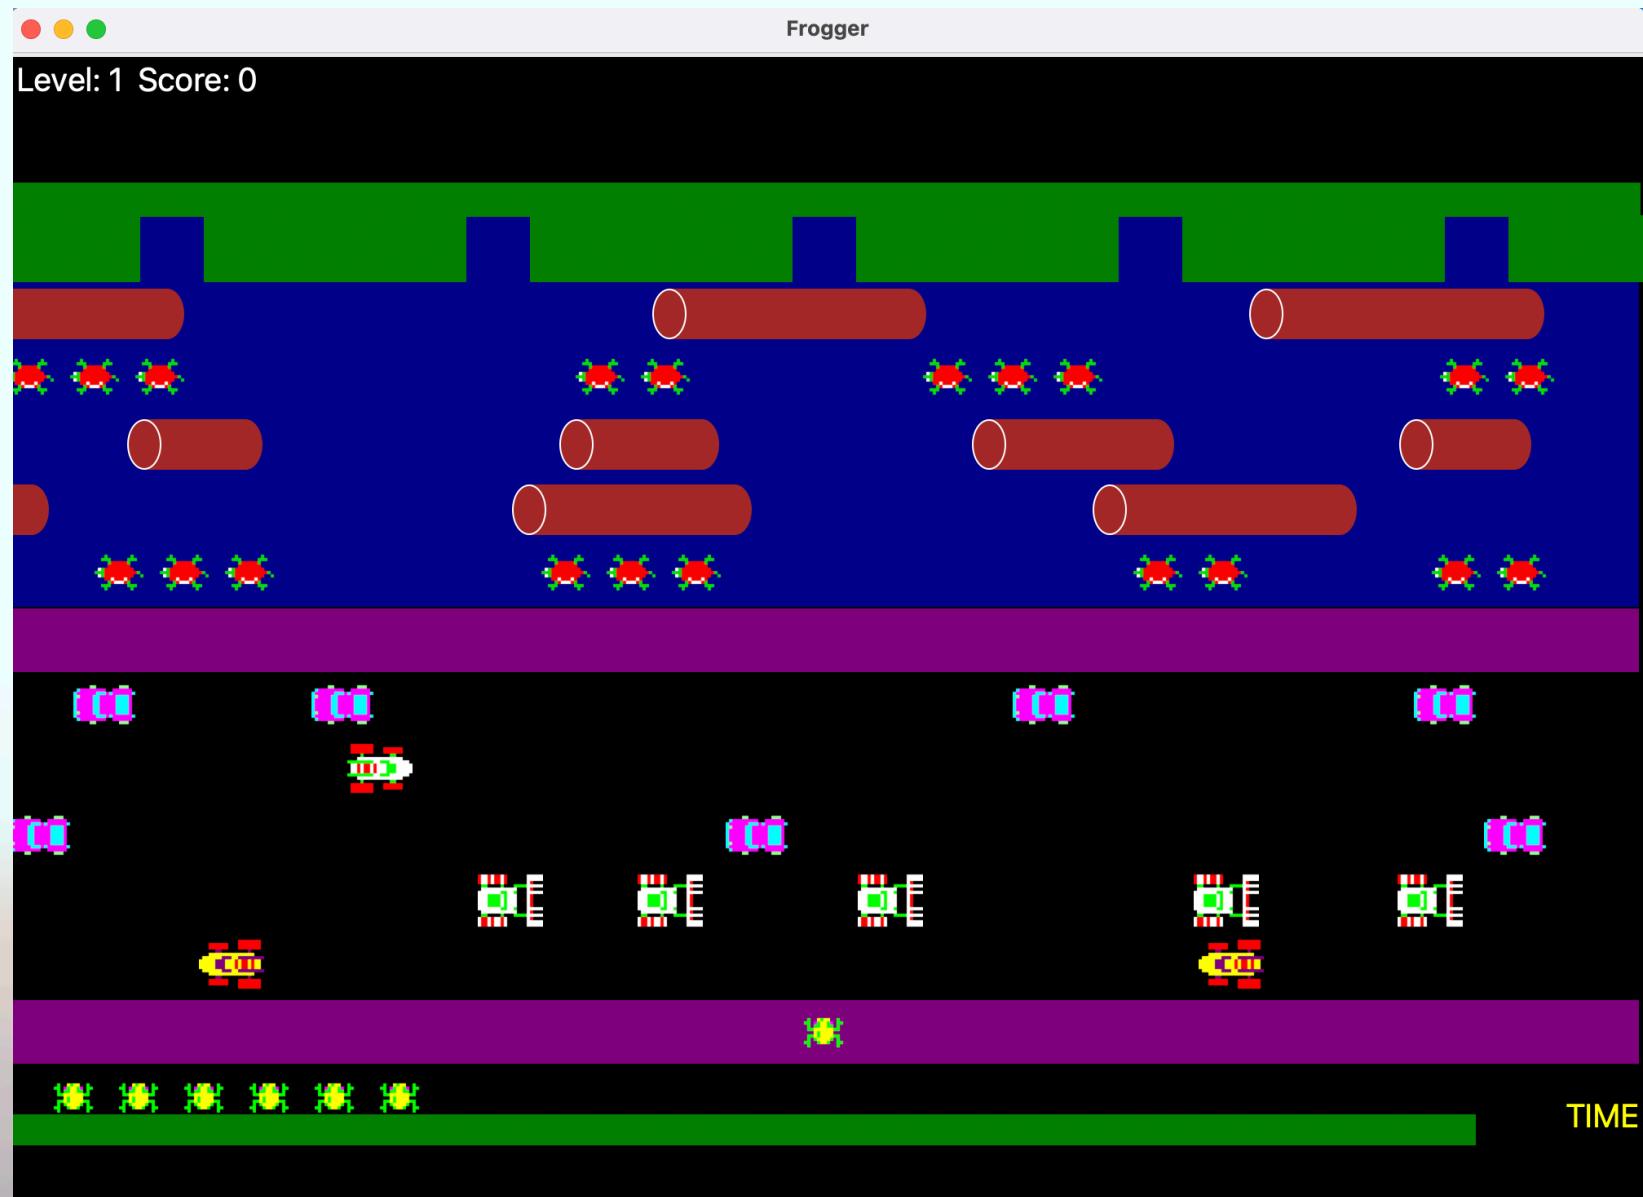

Assignments

Assignment 3: Frogger

Classic Konami/Sega Arcade
Game from 1981

Task: Find five bugs that make
the game unplayable, and fix
them!

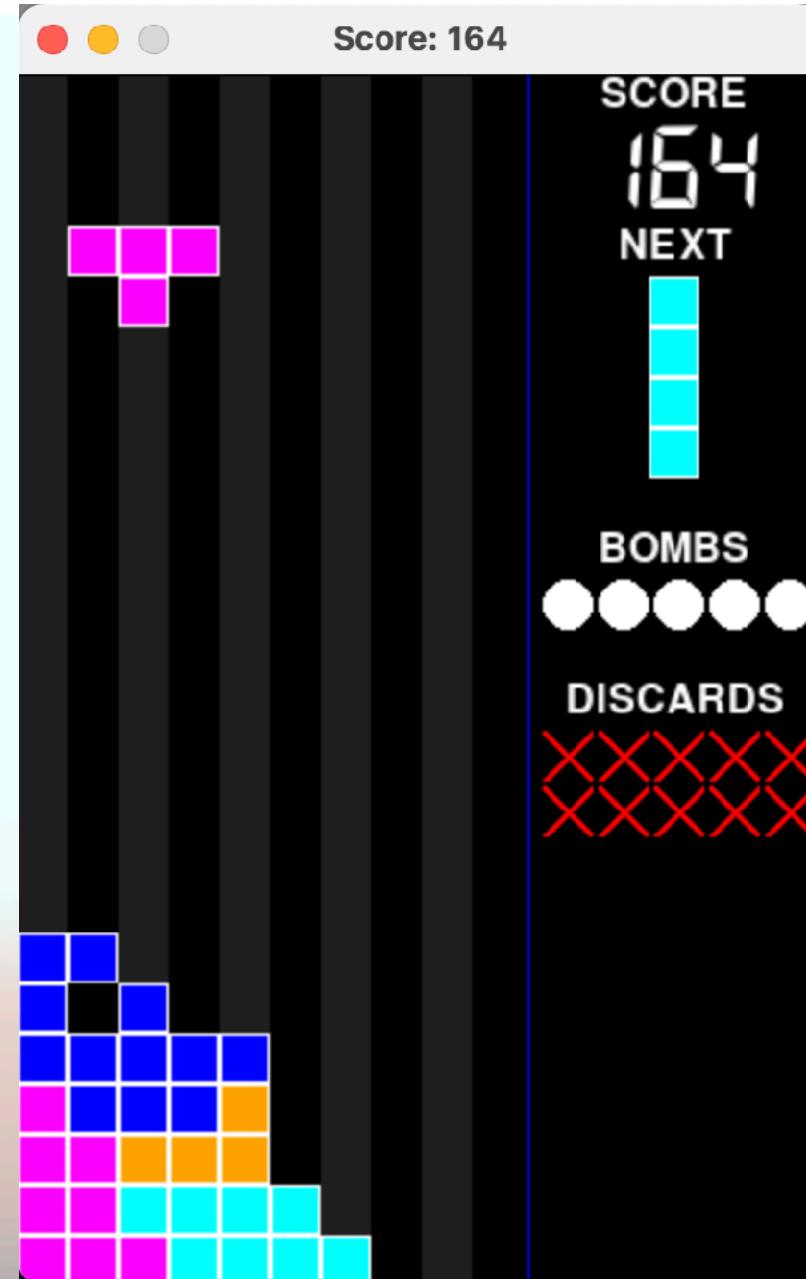

Assignments

Assignment 4: Tetris autoplayer

Puzzle video game created by Alexey Pajitnov in 1985

Game Boy version by Nintendo popularised Tetris in 1989

Task: write a program that plays Tetris and compete with your peers

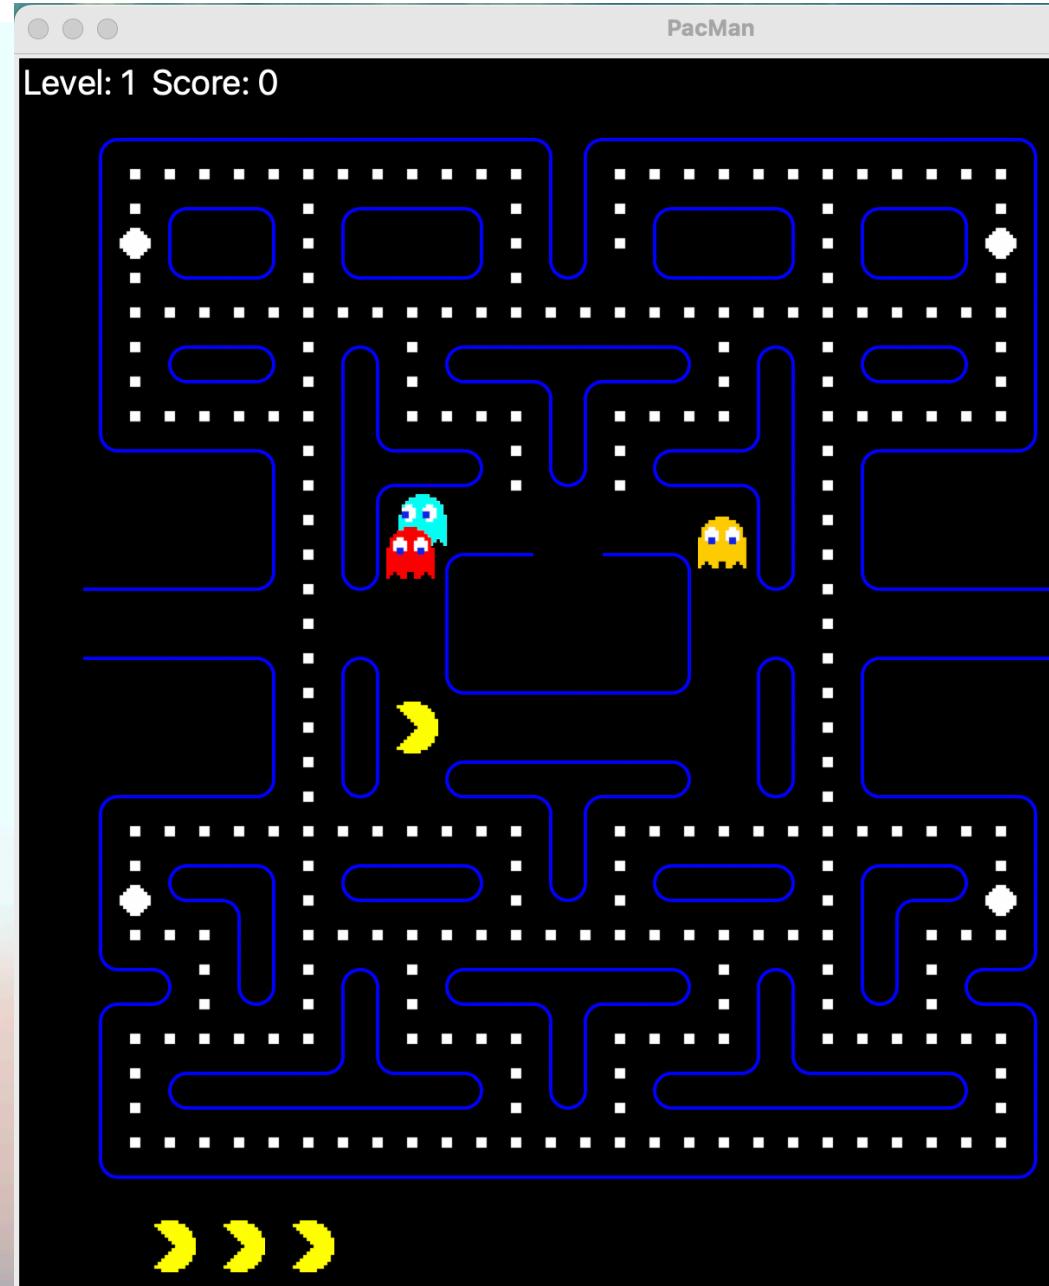

Assignments

Assignment 5:
Write specification
for Pacman game

1980 Maze video game

Special network version of the game

Task: write a better
network protocol
specification for this game

Other remarks

- For assessments 1 - 3 communicate and work with your peers
- If you have questions, it is likely your peers will have similar questions → ask via Moodle forum, **not** via e-mail
- Do not only use forum when you have questions; help your peers and answer their questions, too!
- However, do not ask or post solutions for summative (marked) assessments (4 & 5) → punishable offence
- Make use of forum and the drop-in clinics; do not suffer in silence!
- I know it is tempting to use Large Language Models (like ChatGPT, Gemini, Claude etc.), but there are risks:
 - Often you require programming experience to understand LLM outputs
 - More importantly, you require experience to identify **wrong** outputs!
 - It is not allowed to use LLMs for summative (marked) assessments!

This Friday (October 4)

Pebble in the pond!

When? 11 am - 1 pm

Where?

Holiday Inn Bloomsbury,
Booker and Turner Suite

Next Tuesday (October 7)

Teamwork - Live Session

with Dr Fiona Truscott

When? 11 am - 1 pm

Where?

John Hanbury LT

Now / Next hour ➔ Programming foundations!
